

The ABC Green Home™ 4.0

Net-Zero, Smart Home Education

BUILDER.MEDIA understands high performance home building.

PRESENTED BY **GREEN HOME Builder** **BUILDER AND DEVELOPER**

We created The ABC Green Home Project in 2011 to demonstrate best practice to our 225,000 national home builder, architect, designer, engineer and speciality trade contractor subscribers.

We have partnered with different design teams, architects, engineers, interior designers, builders and two big utilities, **SoCalGas** and **Southern California Edison** and over 150 of our advertisers.

- The ABC Green Home Project has won several major awards, including those received from NAHB, a pair of **Gold Nugget Grand Awards** and the recognition of **Congress and the California state Senate**.
- Our ABC Green Home project homes are certified by **7 Green Agencies** including LEED and The U.S. department of Energy.
- Our ZNE homes adopt a balanced fuel approach using both natural Gas and Electricity.
